# Using synth.kitchen

Connecting to number parameters

Some parameters, like frequency and detune, the incoming signal needs to have gain applied for the modulation to be audible.

https://synth.kitchen/patch/tough-true-trucks-852520c6

Exercise

Combining many oscillators

Start a new patch: synth.kitchen/patch/new

• Add an oscillator and connect it to the speaker

• Repeat, but change the parameters slightly with each new oscillator

• Continue until you have 10+ oscillators
